

Problem 5 - Approximating a Function with Pulses

Pulse 1: $(s_1, s_2, h) = (0, 1, 3)$

Pulse 2: $(s_1, s_2, h) = (1, 2, 4)$

Pulse 3: $(s_1, s_2, h) = (2, 3, 4)$

Pulse 4: $(s_1, s_2, h) = (3, 4, 3)$

$\omega_1 = 0$	$b_1 = 1$	$\phi_1 = 3$	$\phi_0 = 0$
$\omega_2 = 0$	$b_2 = 1$	$\phi_2 = 1$	
$\omega_3 = 0$	$b_3 = 1$	$\phi_3 = 0$	
$\omega_4 = 0$	$b_4 = 1$	$\phi_4 = -1$
